

Texas A&M AgriLife Forage Sorghum Plot Tour August 25, 2026 9:00 AM – 11:00 AM

The 2026 AgriLife Forage Sorghum Plot Tour will be held at the Texas A&M AgriLife Research facility located at Bushland Texas. This trial will provide producers with an opportunity to evaluate 84 different sorghum hybrids in a limited irrigation production environment. Updates on current forage sorghum research projects will also be provided.

- 8:30 am Registration (coffee and donuts provided)
- 9:00 am Welcome and Trial overview with Herbicide management and weed issues in forage and grain sorghum – Kevin Heflin (Texas A&M AgriLife Extension Agronomist)
- Disease Management in Forage Sorghum – Nolan Anderson (Texas A&M AgriLife Research Pathologist)
- Forage Sorghum Use in the Dairy Industry - Juan Pineiro (Texas A&M AgriLife Extension Dairy Specialist)
- Plot descriptions and layout – Carla Naylor (Texas A&M AgriLife Research Agronomy Specialist)
- 10:00 am Open Plot Tour - Public Forage Sorghum Trial

Plots are located at:

35.187557, -102.067724

Exit I-40 at Bushland. Turn south under I-40.

Travel west on the frontage road ~ ½ mile. Follow signs to plots and park in the field area across from the star on the map.
